

Thanks for the opportunity for feedback.

The only comment I have is in relation to the proposed marina. Like it, notably with the integration of the cycle/walk way across the front, with an interesting flow. It'd be great to also see a clearly defined cycle/walk way right around the whole marina — kind of the model of Wgtn waterfront with the main route but then lots of side-options to wander or stop

Probably too soon for that level of comment, but.

Jim
