Comments There are two main lots for which myself and other owners/visitors of Whanarua Bay would be affected.

The joining of lot 66 would be a major blow to the bay as it provides the only vehicular access, not only for me but also those who seek the tranquility the bay provides. I understand the issue is not with the use of lot 66 but instead the release of pressure and resources from this ongoing issue. For this reason I see no way to agree with the proposal and ask that it is revisited with the concerns of both sides considered more carefully.

The joining of lot 80 all but eliminates the use of the bay for myself and other bach users, without this key access to the water, recreational activities that have continued for generations will come to a halt. My reasoning is similar to above, without a clear reason that takes these factors into account I cannot agree to the possibility of losing these rights with no foreseeable net benefit.

Thank you for reading,

Devon Morgan
