**Reasons for support or oppose** I support banning horses being grazed / kept on council land especially. the paddocks and river grazing at the end of Richard St is a bloody disgrace! these horses are constantly wandering out into the township . I have had them come into my section as have many people in that area. We have rung animal control more than once about them and now it isn't in there job description to deal with them it's the owners responsibility - they aren't responsible - they make no effort to make sure their horses are contained properly ,just let to roam freely from the bridge to the wharf. which gives them free access to the town. they are an accident waiting to happen, someone will be killed if they hit one with their car in the middle of the night - as they are quite often roaming around the streets after dark. someone who wants to be a farmer doesn't buy stock before they own or lease a farm, so why do these horse owners do the opposite and think they can just put them where they want! Council should not be providing land for grazing horses full stop - if you do you are responsible for the problem they create. the paddock next to Peria Village looks so much nicer now it is being mowed - do the same with the rest of them and it will look so much nicer for the people using the new footpaths through there, then they won't have to go off the path to go around a horse or their shit all over it!
